

# TABLE QUIZ

**TEAM NAME:** \_\_\_\_\_

**IDENTIFY THE FOLLOWING SCIENTIFIC WORDS  
THAT START WITH THE LETTER 'P':**

No.	CLUE (Number of letters)	SCIENTIFIC WORD
e.g.	A living thing that grows in earth or water (5)	<b>Plant</b>
1	A long-chain molecule formed from many identical smaller ones known as monomers (7)	
2	Subatomic particle that has a positive charge (6)	
3	A large celestial body that revolves in orbit around the sun or some other star (6)	
4	The liquid part of blood from which all cells have been suspended (6)	
5	The force exerted over an area, measured in Pascal's (8)	
6	Chemical element discovered by Marie & Pierre Curie & named after the former's country of birth (8)	
7	Element with chemical symbol 'P' & atomic number 15 (10)	
8	A cell, usually a white blood cell, that surrounds unwanted matter, such as harmful microorganisms (9)	
9	In physics, the rate of doing work or transferring energy, measured in Watts (5)	
10	Surname of Russian physiologist Ivan, noted for his experiments on reflexes & conditioning, especially with dogs (6)	
11	Surname of French scientist Louis who invented the method of treating milk & wine to stop bacterial contamination (7)	
12	Organ that links the blood supplies of the mother & baby via the umbilical cord (8)	
13	Gland behind the stomach that secretes digestive enzymes & hormones that regulate blood glucose levels (8)	
14	Structural components of body tissues such as muscle, hair, etc., & enzymes & antibodies (7)	
15	Bone that is commonly known as the kneecap (7)	
<b>Your Score =</b>

**TEAM NAME:** \_\_\_\_\_

**IDENTIFY THE FOLLOWING SCIENTIFIC WORDS  
THAT START WITH THE LETTER 'P':**

No.	CLUE	SCIENTIFIC WORD
e.g.	A living thing that grows in earth or water (5)	Plant
1	A long-chain molecule formed from many identical smaller ones known as monomers (7)	Polymer
2	Subatomic particle that has a positive charge (6)	Proton
3	A large celestial body that revolves in orbit around the sun or some other star (6)	Planet
4	The liquid part of blood from which all cells have been suspended (6)	Plasma
5	The force exerted over an area, measured in Pascal's (8)	Pressure
6	Chemical element discovered by Marie & Pierre Curie & named after the former's country of birth (8)	Polonium
7	Element with chemical symbol 'P' & atomic number 15 (10)	Phosphorus
8	A cell, usually a white blood cell, that surrounds unwanted matter, such as harmful microorganisms (9)	Phagocyte
9	In physics, the rate of doing work or transferring energy, measured in Watts (5)	Power
10	Surname of Russian physiologist Ivan, noted for his experiments on reflexes & conditioning, especially with dogs (6)	Pavlov
11	Surname of French scientist Louis who invented the method of treating milk & wine to stop bacterial contamination (7)	Pasteur
12	Organ that links the blood supplies of the mother & baby via the umbilical cord (8)	Placenta
13	Gland behind the stomach that secretes digestive enzymes & hormones that regulate blood glucose levels (8)	Pancreas
14	Structural components of body tissues such as muscle, hair, etc., & enzymes & antibodies (7)	Protein
15	Bone that is commonly known as the kneecap (7)	Patella
